About Me

I'm a student from Prishtina working as a backend developer, writing production code since I began my degree. I genuinely get excited when a problem turns out to be harder than it looks, the computer is always right and you just have to figure out why.

Experience

Asaasin AI

April 2025 – Present

Backend Developer

Prishtina, Kosova

- Built a production RAG system over 10+ years of patient records using OpenAI and pgvector, exposing structured medical data and X-ray model outputs through REST APIs for multi-role dashboards and external integrations.
- Designed a Redis-backed caching and background job system for a Meta Ads analytics platform, enabling pre-synced metrics and near-instant dashboard load times.
- Developed backend services for an AI hiring platform including resume scoring, candidate matching, and real-time video transcription using Whisper-based pipelines.
- Owned backend architecture across multiple systems, including FastAPI/Django/Node.js services, Dockerized deployments, CI/CD pipelines, and shared internal infrastructure used across the entire engineering team.

JCoders Academy

February 2024 – September 2024

Programming Instructor

Prishtina, Kosova

- Taught web development and Python to kids and high school students.

Education

UBT - University for Business and Technology

2024 – 2027 (Expected)

Bachelor of Science in Computer Science and Engineering - GPA: 8.5/10

Prishtina, Kosova

Projects

Insignia | *GitHub Webhooks, OpenAI, React, FastAPI*

May 2026

insignia-ruby.vercel.app

- Built a code review intelligence platform that scores every merged PR using AI, weighted by role and seniority.
- Supports custom rules per organization and tracks performance across objective, subjective, and consistency dimensions.

Twin Peaks Cinema | *React, .NET, FastAPI, Stripe, SendGrid, S3, Google Auth*

June 2026

github.com/vesab0/Cinema-management | github.com/vesab0/Movie-recommendation-system

- Full-stack cinema management platform with a hybrid movie recommendation engine built from scratch using KNN, collaborative and content-based filtering, RRF for multi-movie queries, and KMeans for search optimization.
- Automatically emails users when a new movie matches their taste profile via a standalone recommendation API.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Frameworks: FastAPI, Django, Next.js, Node.js, React, Tailwind CSS

Databases: PostgreSQL, Redis

Tools & Infra: Docker, Git, Linux, Vercel, Cursor, Claude Code

Technical Focus

- AI-native builder: RAG, vector search, prompt engineering, and production LLM integrations.
- Proficient with AI-assisted development workflows using LLMs, agentic tooling, prompt engineering, code generation, debugging, automation, context orchestration, and rapid prototyping across modern AI platforms.
- Rapidly adapt to new languages, frameworks, and tools through hands-on implementation and shipped projects.

Extracurricular

FLOSSK – Free Libre Open Source Software Kosovo

February 2026 – Present

Member

- Active member of Kosovo's open source software community.

Hackathons & Game Jams

Participant

- Regular participant in local and international hackathons and game jams
